

EXERCISE 1A

WINDOWS FUNDAMENTALS 1

AIM:

To understand the fundamentals of the Windows operating system, including the Windows desktop, NTFS file system, User Account Control (UAC), Control Panel, and other essential features.

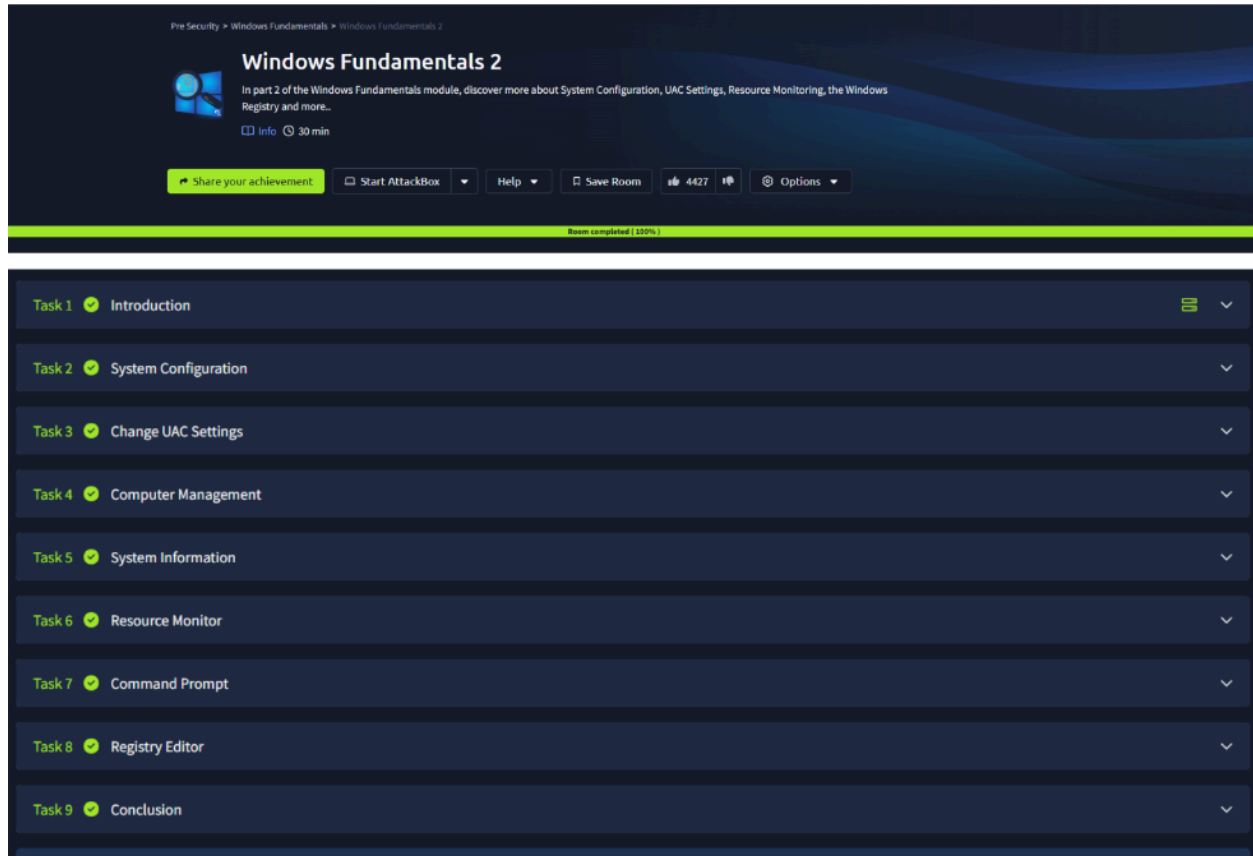

RESULT:

Successfully gained an understanding of the Windows desktop environment, NTFS file system, User Account Control (UAC), Control Panel, and other fundamental Windows features.

EXERCISE 1B WINDOWS FUNDAMENTALS 2

AIM:

To explore advanced Windows functionalities, including System Configuration, User Account Control (UAC) settings, Resource Monitoring, and the Windows Registry, to enhance system management and troubleshooting skills.

RESULT:

Successfully gained knowledge of System Configuration, adjusted UAC settings, monitored system resources, and understood the structure and importance of the Windows Registry.

EXERCISE 1C

WINDOWS FUNDAMENTALS 3

AIM:

To understand and utilize built-in Microsoft security tools such as Windows Updates, Windows Security, and BitLocker to enhance the security and integrity of a Windows system.

The screenshot displays the 'Windows Fundamentals 3' course interface. At the top, it shows the breadcrumb 'Pre Security > Windows Fundamentals > Windows Fundamentals 3'. The main title 'Windows Fundamentals 3' is accompanied by a description: 'In part 3 of the Windows Fundamentals module, learn about the built-in Microsoft tools that help keep the device secure, such as Windows Updates, Windows Security, BitLocker, and more...'. Below this, there is an 'Info' icon and a '30 min' duration. A green bar at the top of the task list indicates 'Room completed (100%)'. The task list consists of 10 items, each with a green checkmark icon and a dropdown arrow:

- Task 1 Introduction
- Task 2 Windows Updates
- Task 3 Windows Security
- Task 4 Virus & threat protection
- Task 5 Firewall & network protection
- Task 6 App & browser control
- Task 7 Device security
- Task 8 BitLocker
- Task 9 Volume Shadow Copy Service
- Task 10 Conclusion

RESULT:

Successfully learned how to configure and manage Windows security features, ensuring system protection through updates, antivirus measures, and encryption mechanisms.
